

RIFA SHERIN

RPA Developer (UiPath) | Intelligent Automation Engineer | AI Workflow Automation

+974 7086 0489 | rifasherin958@gmail.com | Doha, Qatar | LinkedIn
Visa Status – Transferable Visa with NOC

PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on production experience in UiPath RPA and intelligent automation, gained during an internship at Power International Holding (Doha, Qatar). Delivered a production RPA system running unattended across 3 countries (Qatar, Saudi Arabia, UAE) with zero manual intervention, covering IBAN, SWIFT, and account number verification for Gulf-region banks. Passionate about automation that solves real data quality and compliance problems at scale.

TECHNICAL SKILLS

RPA & Automation	UiPath Studio, UiPath Orchestrator, Unattended Bots, ReFramework, Workflow Orchestration, n8n
AI & Data	Python (ML pipelines, SMTP alerts, data processing), SQL, Data Validation & Cleansing, Excel Automation
Web & APIs	REST APIs, Node.js, React.js, JavaScript, MySQL, PostgreSQL, MongoDB
Cloud & DevOps	Oracle Cloud (OCI), AWS, Docker, Git, CI/CD basics
Domain Knowledge	Banking data governance, IBAN/SWIFT/BBAN standards, Gulf-region bank validation (QA, KSA, UAE)

PROFESSIONAL EXPERIENCE

Intelligent Automation Developer (Intern) Power International Holding • Doha, Qatar	Jan 2026 – April 2026
---	-----------------------

- Built and deployed a multi-country Bank Validation System (Qatar, Saudi Arabia, UAE) using UiPath Studio and Orchestrator, processing banking records with zero manual intervention.
- Designed a two-phase IBAN validation engine (structural checks against Gulf-region standards, then live cross-referencing via browser automation) plus SWIFT/account verification with six-condition status classification.
- Configured unattended bot deployment via Orchestrator (Machine Key setup, trigger scheduling, remote monitoring) and delivered automated exception reports for finance and compliance teams — replacing a fully manual review process.

Full Stack Developer (Intern) Thaniya Technologies • Mangalore, India	Feb 2025 – May 2025
---	---------------------

- Built dynamic web applications using React.js and Node.js, integrating REST APIs for real-time data exchange between frontend and MySQL backend.

- Optimised database query performance and data handling pipelines for improved response times.
- Collaborated in Agile sprints using Git/GitHub, contributing to code reviews and feature delivery within fortnightly release cycles.

Cybersecurity Intern
DLithe • Bangalore, India

Oct 2023 – Nov 2023

- Conducted vulnerability assessments and penetration testing including SQL injection analysis; documented findings and recommended hardening measures.

PROJECTS

Bank Validation System - UiPath RPA | Power International Holding, Qatar

- Multi-country automation validating IBAN, SWIFT codes, and account numbers for Gulf-region banks across Qatar, Saudi Arabia, and UAE using UiPath Studio and Orchestrator.
- Delivered automated Excel reporting with status classification and corrective action guidance for compliance teams.

AI-Powered Bid Automation Pipeline — n8n + Python

- Built a 13-node n8n workflow integrating Python scripts and an LLM API to detect hiring posts, generate tailored bid responses, and deduplicate leads via SQLite
- Automated post detection and AI response drafting, reducing manual research time by over 80%.

Fraud Detection System — Machine Learning

- Built a credit card fraud detection model analysing historical transaction data; integrated an SMTP alert system for real-time fraud notifications.

EDUCATION

B. Tech in Computer Science Engineering
Shree Devi Institute of Technology (VTU) • Karnataka, India

2021 – 2025
